

SHALIN SHUKLA

📍 Moose Jaw, SK S6H 📞 (639)-538-0039 ✉ shalin@druproidsupport.com

An astute Drupal Developer with management, diverse skill sets, and more than 4 years of experience. Proficient at both developing and managing web applications, writing customized code for complex requirements, feature development, and implementation. Specialist in providing out-of-the-box solutions to difficult engineering problems. Worked on Banking applications, Intranet, Extranet, IPOs, Corporate sites, Web-scraping to eCommerce sites. From gathering requirements to providing estimates and from Developing, deploying sites and applications to making it live. I have worked on the entire project life cycle following Agile and Waterfall principles. For an opportunity in web development field, where my technical and managerial knowledge is used skillfully to achieve the optimum business goals.

WORK EXPERIENCE

- 1. Drupal developer – Addweb solution (<https://www.addwebsolution.com/>)** **SEPT-17 to MAR-19**
 - I. Backend and Frontend development for Drupal website.
 - II. Create project documents and feature outlines.
 - III. Prepare estimates document.
 - IV. maintenance and monitoring websites.
 - V. Interacting with clients for requirements gathering
 - VI. Write documentation for the developed features.

- 2. Sr. Drupal Developer - Investisdigital (<https://www.investisdigital.com/>)** **MAR-19 to SEPT-22**
 - I. Worked and handle multiple project
 - II. Lead a development team and work as a senior resource there
 - III. Create project documents and gather client requirements
 - IV. Prepare future approaches and outline
 - V. Manage backend and frontend
 - VI. maintenance and monitoring websites.
 - VII. Interacting with clients on scrum calls and provide client training for CMS
 - VIII. Write documentation for the developed features.

- 3. SR. Developer/Team Lead – Druproidsuport (<https://druproidsupport.com/>)** **FEB-19 to Present**
 - I. Handling multiple projects
 - II. Prepare approaches and outline for complex features
 - III. Manage backend and frontend
 - IV. Creating project documents and training documents for client
 - V. Interacting with clients for requirement gathering
 - VI. Write documentation for the developed features.

EDUCATION AND QUALIFICATIONS

Bachelor Of Computer Engineering

Sep 13 - Apr 17

GTU, India

CGPA: 8.56

Post grad in Technology Management & Software Developer (Present)

Saskatchewan Polytechnic

Canada

SKILLS:

- CMS: Drupal 7|8|9
- Front-End Skills: HTML, CSS
- Web Technologies: jQuery, Bootstrap
- Database: Microsoft SQL Server MySQL
- Website Maintenance
- Web Architecture
- Teamwork and Collaboration
- Project Management
- Back-End and Twig engine for the front end
- Scripting Languages: PHP, JavaScript
- Version Control Systems: Git, GitHub, GitLab

PROJECTS:

1) Buy NJ Home: (<https://buynjhome.com/>)

a) DEVELOPED AT: DRUPROID SUPPORT INC.

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Module Customization.
- (2) Custom age gate development
- (3) Custom component with layout builder
- (4) Created many grids component

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project
- (2) Create entire theme from scratch
- (3) Create custom modules to manage the functionality
- (4) Manage configuration among different environments

2) Leaps

a) DEVELOPED AT: DRUPROID SUPPORT INC.

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Module Customization.
- (2) Custom report with different events.
- (3) Personalization for students and teachers as a user

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project
- (2) Create custom forms with form API and manage survey features
- (3) Create custom modules to manage student and teacher module
- (4) Create Assessment feature and manage different method of survey with different methods
- (5) Manage configuration among different environments

3) Butterfield group: (<https://www.butterfieldgroup.com/>)

a) DEVELOPED AT: Investisdigital

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Module Customization.
- (2) Custom domain development for different countries
- (3) Custom component with layout builder
- (4) Personalization based on country.

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project mainly and worked on the frontend
- (2) Create custom module for managing the block based on cookie and post that module in community https://www.drupal.org/project/cookie_block
- (3) Create custom modules to manage the geo location feature
- (4) Create all the components with the help of layout builder
- (5) Manage configuration among different environments

4) BrookfieldIntranet: (<https://www.brookfieldintranet.com/>)

a) DEVELOPED AT: Investisdigital

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Module Customization
- (2) Intranet with custom login approach.
- (3) Personalization with ECK entity types with custom rules for users
- (4) Built website with the support of layout builder.
- (5) Multi-site architecture development & news listing with complex filter

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project and single sign on for the project with Microsoft azure
- (2) Create custom features to manage the intranet and personalization for different users
- (3) Create custom modules to manage many custom features like different time zone, quick links
- (4) Manage configuration among different environments

5) Heineken IR: (www.theheinekencompany.com)

a) DEVELOPED AT: Investisdigital

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Module Customization.
- (2) Custom age gate development
- (3) Custom component with layout builder
- (4) Created many grid components.

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project
- (2) Create entire theme from scratch with ECK component
- (3) Create custom modules to add features copy component and paste it on another page
- (4) Manage configuration among different environments

6) wildstyle-network: (www.wildstyle-network.com)

a) DEVELOPED AT: Addweb Solutions

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Theme and Module Customization
- (2) Multi-lingual website, Third Party API integration for news content.
- (3) The entire website has been built as a component approach using ECK.
- (4) The websites all components can be reused anywhere on the site.

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project
- (2) Create entire theme from scratch
- (3) Create custom modules to manage the functionality
- (4) Manage configuration among different environments

7) Lowes: (<https://corporate.lowes.com>)

a) DEVELOPED AT: Investisdigital

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Theme and Module Customization
- (2) Third Party API integration for sales force form.
- (3) The entire website has been built as a component approach using ECK.
- (4) Multi-site architecture development & Career portal integration
the jobs

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project
- (2) Create multisite architecture for the website
- (3) Create custom modules to create career API integration
- (4) Create custom module to show geolocation job based on distance sorting and create different cluster map
features
- (5) Create a custom map with cluster and manage with it more than 10k data

8) Tastepoint (<https://tastepoint.com>)

a) DEVELOPED AT: Investis Digital

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Theme and Module Customization
- (2) Custom login window.
- (3) The entire website has been built as a component approach using ECK.
- (4) Multi-site architecture development & news listing with complex
filter

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project
- (2) Create entire theme from scratch with ECK component
- (3) Create custom modules to add features copy component and paste it on another page
- (4) Manage configuration among different environments

9) Endeavour-Mining (<https://www.endeavourmining.com/investors>)

a) DEVELOPED AT: Investis Digital

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Module Customization
- (2) Custom print pages option with ZIP.
- (3) Image mapping with backend support
- (4) Built website with the support of layout builder.
- (5) Multi-site architecture development & news listing with complexfilters

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project
- (2) Create entire theme from scratch with ECK component
- (3) Create a custom image mapping functionality to map different interactive feature over an image with the backend support
- (4) Manage configuration among different environments
- (5) Manage the website with multisite concept

10) IFF CORP (<https://www.iff.com>)

a) DEVELOPED AT: Investis Digital

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Module Customization
- (2) Reusable component.
- (3) Built website with the support of layout builder.
- (4) Multi-site architecture development & news listing with complexfilters

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project
- (2) Create entire theme from scratch with ECK component and layout builder
- (3) Manage configuration among different environments
- (4) Manage the website with multisite concept
- (5) Create different component with the help of ECK components and shared it with manage display mode and form mode

11) Eurowag IR (<https://investors.eurowag.com>)

a) DEVELOPED AT: Investis Digital

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Module Customization
- (2) Reusable component.
- (3) Built website with the support of layout builder.
- (4) Multi-site architecture development & news listing with complexfilters

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project
- (2) Create entire theme from scratch with ECK component and layout builder
- (3) Manage configuration among different environments
- (4) Create different component with the help of ECK components and shared it with manage display mode and form mode

12) Marksandspencer IR (<https://corporate.marksandspencer.com/investors>)

a) DEVELOPED AT: Investis Digital

i) TOOLS & TECHNOLOGY:

- (1) Drupal 8, Module Customization
- (2) Reusable component.
- (3) Built website with the support of layout builder.
- (4) Multi-site architecture development & news listing with complexfilters

ii) ROLE & RESPONSIBILITY

- (1) Handle the backend of the project and lead the team
- (2) Create entire theme from scratch with ECK component and layout builder
- (3) Manage configuration among different environments
- (4) Manage the website with multisite concept
